THE RENOVATION PROTECTION PLAN

Keep your floors. Plan the work.

A cover is one part of the plan, not a promise of no damage.

AI illustration. A protected room before work starts. Not completed work.

CHOOSE / AGREE / CHECK

Two worked plans, tape questions and a phone note. Use them to agree who protects, checks and uncovers the floors you want to keep.

7 pages. Free to save and share. Checked 17 November 2026.

01 / CHOOSE FOR THE RISK

Same floor. Different jobs.

Tell the team what work will happen on each part of the floor.

PAINT / Drips and dust

Covering helps keep paint off the floor. A thin paint cover is not proof of protection from tools or heavy loads.

FITTING / Trips and sharp bits

A kitchen or wardrobe job brings boards, tools and waste. Ask for a cover system and staging area for that work.

ASK BEFORE BUYING

What is our floor finish? What touches it? What goes above that? What can this system not protect against?

Use the floor and cover makers' instructions. No one cover suits every floor or stops every impact.

02 / THE TAPE QUESTION

Join the cover. Mind the finish.

Do not assume seam tape is safe to stick to a floor.

AI illustration. Tape joins sheets, not bare tile.

A useful maker example

Ram Board says its seam tape must not touch the floor. Edge tape is different. Check the exact product.

WRITE THE ANSWER

Tape: ____. Floor finish: ____.
Test and time limit: ____.
Removal method: ____. Checked by: ____.

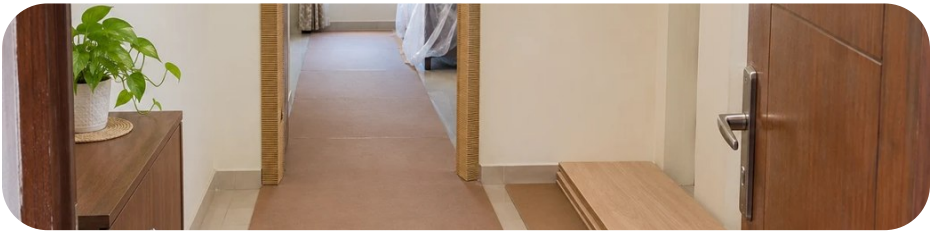

Start clean and dry. Ask before covering fresh finishes or damp patches. A test is not a whole-floor guarantee.

03 / DRAW THE CARRYING ROUTE

Cover the path. Keep it clear.

Plan from the entrance to the work room, including turns.

AI illustration. A clear path and a separate place for panels.

A THREE-PLACE PLAN

1 / Carrying path: ____. 2 / Material staging: ____. 3 / Waste pickup: ____. Keep doors and the way out clear.

For a flat, ask the building team

Confirm lift use, delivery hours and common-area protection. Record the actual society rules; do not copy another building's plan.

When the work room changes, check the route again.

04 / TWO WORKED PLANS

Same aim. Different scope.

Made-up planning examples, not completed jobs or price quotes.

HOME A / Paint in one empty room

Keep the tile floor. Photograph old chips. Agree paint-splatter protection, suitable edge treatment and cleanup. Check the floor when the cover comes off.

HOME B / Kitchen units through a hall

Keep the hall floor. Add a checked carrying route, a panel-staging patch and door-edge care. Name who replaces torn cover and clears grit each day.

Why the quotes may differ

Home B adds trips, material handling and upkeep. Compare the full protection work, not only the cost of a roll.

Ask each team to price the same rooms, route and duties.

05 / COPY INTO PHONE NOTES

Agree the duties. Check each day.

Send this short note with your room photos and work list.

THE PROTECTION NOTE

Keep these floors: ____. Existing marks: ____. Cover and tape: ____. Route and staging: ____. Fit by: ____. Check by: ____. Replace by: ____. Remove and clean by: ____.

DAILY / Before the first load

Date: ____. Joins flat? Tears or grit? Any wet patch? Route clear? New mark? Tell: ____. Action before more work: ____. Add a photo.

FINAL / Uncover together

Agree removal. Check corners, door steps and staging spots. Compare the before photos. Record concerns before closing the work.
