KITCHEN WORK / THE FAMILY PLAN

Stay at home? Plan daily life.

A practical plan for meals, clean space and a backup stay.

AI illustration. Inspiration, not a completed project.

STAY / LEAVE FOR A STAGE / STAY ELSEWHERE

Choose by what your family can safely use each day, not only by the promised finish date. Includes two examples and a phone-note plan.

7 pages. Free to save and share. Checked 8 November 2026.

01 / CHOOSE BY THE WORK

One home. Three options.

Discuss the actual stages with your team.

STAY / A SMALL, SEPARATE JOB

Example: doors are changed while sound cabinets stay. Ask when the kitchen is off limits and where meals happen. Small work still needs a safe work area.

LEAVE FOR DISRUPTIVE STAGES

Example: the worktop comes out and walls are cut. Plan to be away for those stages and cleanup. Return only after the team checks the space.

Stay elsewhere for longer

If there is no clean area, safe exit, water or workable meal setup, discuss a longer stay away. These examples are not safety approval for a particular home.

02 / BEFORE THE OLD KITCHEN COMES OUT

Ready to start? Check the basics.

Do not remove useful fittings based on hoped-for delivery.

Work and deliveries

Confirm ready materials, booked trades and the current drawing. Ask what still depends on a visit or delivery.

The daily-use gap

Note when the old sink and cooker stop. Include drying, testing and cleanup in the return-to-use plan.

FAMILY EXAMPLE / A DELAY

The new worktop is delayed. Do not assume cooking can restart between unfinished jobs. Check the meal plan and backup stay before accepting a new date.

Backup stay: name a place and confirm it is available. A vague offer is not a booking.

03 / MAKE A MEAL PLACE

Clean meals. Away from work.

Choose a place off the waste-carrying route.

AI illustration. A separate place for covered food and utensils.

Keep the daily set small

Covered plates, cups, meal boxes, drinking water and a place for used dishes. Plan washing up without entering the work area.

A SIMPLE MEAL PLAN

Breakfast: ____. Lunch: ____. Dinner: ____. Who receives meals: ____. Check diet needs and delivery times. Use your own supplier and prices.

Any temporary cooking appliance needs a suitable checked point and its own use rules. Do not improvise a gas connection.

04 / KEEP DAILY LIFE WORKING

Cold storage. Clear paths.

Discuss these details before the work begins.

AI illustration. Keep the appliance reachable and follow its guide.

If the fridge moves

Who moves it? Where will it stand? Who checks power? Follow the exact model instructions for moving and restarting. Keep access to the door.

DAILY-LIFE COSTS / USE YOUR FIGURES

Extra meals per day: ____. Days: ____. Temporary stay and travel: ____. Storage and cleaning: ____. Compare the full plan, not just the cabinet price.

Ask your building team about work hours, lift use and waste. Keep shared passages and your exit clear.

gandhinagar services

05 / COPY INTO PHONE NOTES

One daily note. One pause rule.

Agree who sends updates and when.

Today and tomorrow

Work stage: ____. Kitchen off limits: ____. Sink / cooking / power available: ____. Clean family area: ____. Waste route: ____.

Meals and the backup

Meals arranged by: ____. Fridge access: ____. Backup stay: ____. Person to call: ____. Next update due: ____.

PAUSE THE STAY-AT-HOME PLAN

If clean separation, safe access, needed water or safe power is lost, contact the site lead. Use the backup stay until the issue is checked. Do not push through an unsafe setup.

Ask trades to test the finished services before use. Follow product drying and airing instructions. No fixed return date fits every job.
