

THE PRACTICAL LOCAL HOME GUIDE

Randesan. Room to live well.

Home, kitchen, bathroom, carpentry and plumbing. One clearer renovation plan.

AI illustration. Natural home inspiration; not an actual project in this location.

KEEP / PLAN / CHECK

Plan better room layouts, useful storage and accessible fittings before agreeing work in your Randesan home.

8 pages. Free to read, save and share.

01 / START WITH YOUR HOME

Your local plan.

A bedroom may also need study space, and a living room may need hidden household storage. For your Randesan renovation, start by mapping how the rooms are used. Then choose the work that improves movement, reach and daily routines without filling every wall with cabinets.

- 01 Mark bed, desk and seating positions before fitted storage**
- 02 Keep comfortable paths and usable door openings**
- 03 Check light, switches and service access around new units**
- 04 Compare storage improvements with larger layout changes**

Before the visit

Tell us the Randesan society or street, property type and rooms involved. Send wide room photos as well as close-ups of the problem. Access, building rules and existing services are checked for your home before the work is scheduled.

02 / HOME RENOVATION.

Home renovation.

Plan room layouts, wall finishes and flooring around furniture and movement. Coordinate storage and wet-area work as part of the same plan.

What may stay

Keep furniture that works well and test a simpler arrangement before changing walls or floors. Mark optional work separately.

Put this in the scope

Draw the routes between doors, seating and storage. Ask for a measured plan before approving fitted units or significant layout work.

EXAMPLE / A STUDY-BEDROOM

Compare moving loose furniture with adding a fitted desk and wardrobe. Draw the door opening and walking route in both options before approving the larger job.

03 / KITCHEN RENOVATION.

Kitchen renovation.

AI illustration. A planning idea, not a completed local project.

Improve usable cabinets, worktop organisation and daily cooking space. Assess countertop, backsplash, sink and hardware together.

What may stay

A cabinet organiser or repaired drawer may solve a storage problem without a complete kitchen replacement.

Put this in the scope

List tall utensils, daily appliances and pantry needs. Ask how cabinet depth and opening space affect the aisle and working counter.

More about this service on our website

04 / BATHROOM RENOVATION.

Bathroom renovation.

AI illustration. A planning idea, not a completed local project.

Discuss compact storage, worn tiles, drainage and basin or shower improvements. Choose useful access over extra fittings.

What may stay

A practical vanity refresh may be enough where surfaces and pipework are sound. Inspect moisture before enclosing storage.

Put this in the scope

Check the space around doors, toilet and basin. Ask where water valves remain accessible and how repairs are tested.

05 / CARPENTRY & WARDROBES.

Carpentry & wardrobes.

Create wardrobes and study desks that fit the room and your actual storage needs. Repair doors, cabinets and drawers where possible.

What may stay

Open shelves, loose furniture or a smaller fitted unit may keep a study-bedroom flexible as needs change.

Put this in the scope

Measure wall width at several points, usable height and bed clearance. Compare hinged and sliding doors for access, cost and maintenance.

HINGED OR SLIDING?

Hinged doors need swing space; sliding doors need suitable depth and tracks. Compare access to the interior, hardware and future adjustment as well as the total price.

06 / PLUMBING REPAIRS.

Plumbing repairs.

Arrange local assessment of leaking taps, drain joints, sink connections and toilet fittings before new furniture closes off access.

What may stay

Keep service points reachable. Avoid a new cabinet that makes a simple future repair require dismantling furniture.

Put this in the scope

Photograph pipe positions and tell us when the issue occurs. Agree removal, refitting and leak checks if carpentry and plumbing overlap.

KEEP THE REPAIR REACHABLE

A vanity with a removable access panel can make a future fitting repair simpler. Agree the service opening before the carpenter builds around the pipes.

07 / QUOTE, SAVE & SHARE

Quote. Save. Share.

Compare the same complete job

Ask for measured work, material specifications, labour, removal, delivery, cleanup, taxes and payment stages. Agree the cost and time of changes first.

Renovation estimates are free. Standalone carpentry or plumbing visits are ₹100, waived when you opt for the service. Labour and materials are agreed separately.
