

THE PRACTICAL LOCAL HOME GUIDE

Raysan. Ready for daily life.

Home, kitchen, bathroom, carpentry and plumbing. One clearer renovation plan.

AI illustration. Natural home inspiration; not an actual project in this location.

KEEP / PLAN / CHECK

Measure for move-in, check existing defects and coordinate kitchens, bathrooms, wardrobes and repairs in your Raysan home.

8 pages. Free to read, save and share.

01 / START WITH YOUR HOME

Your local plan.

For a Raysan move-in or renovation, connect the layout to the things you already own. Appliance sizes, bed positions, door swings and storage needs are more useful starting points than a finish sample alone. If the home is newly handed over, record existing defects before covering them.

- 01 Record existing defects before starting new interior work**
- 02 Confirm appliance and furniture sizes before cabinet drawings**
- 03 Separate move-in essentials from upgrades that can wait**
- 04 Check material delivery access and building work permissions**

Before the visit

Send the Raysan building or street name, floor and whether the home is ready for access. If a builder or society team still handles defects, clarify those responsibilities before commissioning new work. We confirm scheduling for the actual address.

02 / HOME RENOVATION.

Home renovation.

Coordinate room finishes, storage and practical layout improvements around your move-in date or renovation priorities.

What may stay

Retain sound finishes and useful furniture if they suit the plan. A home does not need every surface replaced to feel settled.

Put this in the scope

Make a separate list of existing defects, new work and optional upgrades. Confirm who will resolve each item and the order before move-in.

EXAMPLE / MOVE-IN ESSENTIALS

Compare a first scope for usable rooms and essential repairs with a second scope for decorative additions. A target move-in date is not a confirmed completion promise.

03 / KITCHEN RENOVATION.

Kitchen renovation.

AI illustration. A planning idea, not a completed local project.

Plan cabinets and worktops around your hob, refrigerator, purifier and daily cooking. Assess existing cabinets before replacing them.

What may stay

A good counter position may stay while storage and hardware improve. Compare usable workspace rather than cabinet count alone.

Put this in the scope

Provide appliance dimensions and check door opening, ventilation and socket access with the installer. Confirm sink and purifier connections in the scope.

04 / BATHROOM RENOVATION.

Bathroom renovation.

AI illustration. A planning idea, not a completed local project.

Review taps, showers, drainage, tiles and vanity space. Separate a fitting upgrade from a more involved bathroom renovation.

What may stay

Working sanitary fittings may stay if their condition and the new layout allow. Record any existing leaks before installation work.

Put this in the scope

Ask which plumbing, surface preparation and testing are included. Keep access to valves and service points after fitting new storage.

05 / CARPENTRY & WARDROBES.

Carpentry & wardrobes.

Plan wardrobes, shoe storage, study desks and TV units around room measurements and your existing furniture.

What may stay

Loose furniture can fill a room while fitted storage is completed. Avoid commissioning a unit before bed and door positions are clear.

Put this in the scope

Compare board specifications, internal shelves, hanging space, hardware and installation. Leave clear access to switches and service points.

BEFORE THE DRAWING IS FINAL

Mark your actual bed, doors and switches on the room plan. Confirm internal hanging and drawer needs before choosing the outside finish.

06 / PLUMBING REPAIRS.

Plumbing repairs.

Get local help with tap leaks, sink and basin installation, toilet fittings and water connections during move-in or renovation.

What may stay

Ask for an assessment before adding concealed or extended pipe runs. A suitable fitting replacement may be enough.

Put this in the scope

Identify the shutoff arrangement with the building team where needed. Confirm existing defects and installer responsibility before changing connections.

RECORD THE STARTING CONDITION

A leaking fitting found before move-in belongs on the defect list. Clarify responsibility with the building or builder team before another installer changes it.

07 / QUOTE, SAVE & SHARE

Quote. Save. Share.

Compare the same complete job

Ask for measured work, material specifications, labour, removal, delivery, cleanup, taxes and payment stages. Agree the cost and time of changes first.

Renovation estimates are free. Standalone carpentry or plumbing visits are ₹100, waived when you opt for the service. Labour and materials are agreed separately.
