

THE PRACTICAL LOCAL HOME GUIDE

Sargasan. Make space count.

Home, kitchen, bathroom, carpentry and plumbing. One clearer renovation plan.

AI illustration. Natural home inspiration; not an actual project in this location.

KEEP / PLAN / CHECK

Choose a useful first phase, keep sound parts and compare practical upgrades for your Sargasan home.

8 pages. Free to read, save and share.

01 / START WITH YOUR HOME

Your local plan.

If your Sargasan home needs more usable space, begin with the daily friction: a crowded counter, a sticking cupboard, poor storage or an unreliable fitting. A compact room can benefit from a targeted repair or better arrangement before a larger renovation is considered.

- 01 Fix leaks and unreliable fittings before decorative upgrades**
- 02 Prioritise daily-use storage and clear working surfaces**
- 03 Compare smaller repairs with full replacement**
- 04 Agree a first phase and a separate optional-work budget**

Before the visit

Send your Sargasan address, floor, access details and a short list of priorities. If you are renting, confirm owner permission before fitted or permanent changes. Building access and work arrangements are agreed for the actual property.

02 / HOME RENOVATION.

Home renovation.

Plan a room refresh or phased makeover around the changes you will use every day. Coordinate finishes, storage and repairs within the agreed budget.

What may stay

Sound flooring and furniture can stay while the most useful room is improved. Reassess optional work after the first phase.

Put this in the scope

Ask for essential repairs, first-phase upgrades and later options as separate items. Confirm protection and cleanup for rooms that remain in use.

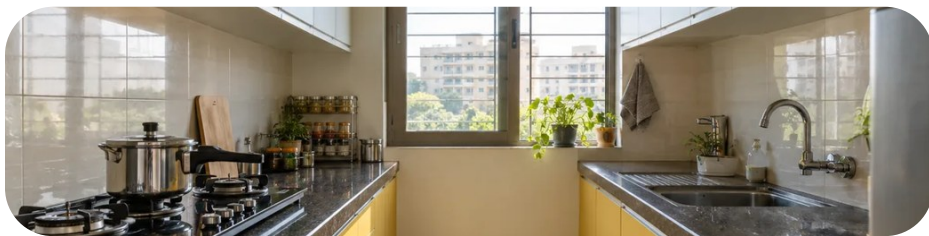

EXAMPLE / A USEFUL FIRST PHASE

Compare repairing a sticking cabinet and refreshing one room with replacing every unit. Keep essential repairs separate from the later wish list.

03 / KITCHEN RENOVATION.

Kitchen renovation.

AI illustration. A planning idea, not a completed local project.

Recover working counter space and improve compact kitchen storage. Discuss cabinet repairs, useful drawers, worktops and sink fittings.

What may stay

Repair a drawer, change a hinge or reorganise a shelf before assuming the cabinet must go. Retain the layout where it works.

Put this in the scope

List daily appliances and utensils. Check that new storage opens comfortably and does not block the kitchen route or service points.

More about this service on our website

04 / BATHROOM RENOVATION.

Bathroom renovation.

AI illustration. A planning idea, not a completed local project.

Prioritise drainage, leaks and comfortable daily use, then consider tiles, vanity storage and new sanitary fittings.

What may stay

A tap or fitting repair can be a first phase if the surrounding surfaces are sound. Hidden moisture needs assessment before new finishes.

Put this in the scope

Ask what needs opening, which surfaces will be reinstated and how plumbing and waterproofing checks are documented.

05 / CARPENTRY & WARDROBES.

Carpentry & wardrobes.

Create storage with a measured footprint: wardrobes, compact desks, shoe cabinets or furniture repairs.

What may stay

A repaired cabinet or adjusted door may solve the immediate issue. Compare a compact unit with a full-wall wardrobe for both space and cost.

Put this in the scope

Measure the unit depth, door opening and walking space. Ask for the complete material and hardware specification before comparing totals.

SMALLER CAN BE MORE USEFUL

Compare a compact wardrobe with a full-wall unit. Include usable depth, door clearance and what must be stored, rather than price per unit alone.

06 / PLUMBING REPAIRS.

Plumbing repairs.

Get local help with leaking taps, basin and sink joints, toilet fittings and renovation connections. Deal with water problems before new woodwork.

What may stay

An accessible replacement part may be the practical solution. Request assessment rather than assume the visible wet spot is the source.

Put this in the scope

Explain whether the leak is constant or follows use. Agree labour, parts, removal and refitting costs, then check under normal use.

GET THE COMPLETE SMALL-JOB PRICE

A fitting price alone may exclude labour, removal or cabinet refitting. Agree the full job and any additional work before the repair starts.

07 / QUOTE, SAVE & SHARE

Quote. Save. Share.

Compare the same complete job

Ask for measured work, material specifications, labour, removal, delivery, cleanup, taxes and payment stages. Agree the cost and time of changes first.

Renovation estimates are free. Standalone carpentry or plumbing visits are ₹100, waived when you opt for the service. Labour and materials are agreed separately.
