

THE PRACTICAL LOCAL HOME GUIDE

Vavol.

A clear home plan.

Home, kitchen, bathroom, carpentry and plumbing. One clearer renovation plan.

AI illustration. Natural home inspiration; not an actual project in this location.

KEEP / PLAN / CHECK

Coordinate room updates, retain sound parts and compare a clear renovation scope for your Vavol home across all five services.

8 pages. Free to read, save and share.

01 / START WITH YOUR HOME

Your local plan.

For a Vavol renovation, start with the rooms you use and the repairs they need. Map the work area, access and furniture you want to keep before selecting finishes. If several trades are involved, agree their sequence so a new cabinet or surface does not have to be opened again for a missed repair.

- 01 List essential repairs before choosing decorative finishes**
- 02 Identify furniture, cabinets and fittings worth retaining**
- 03 Agree access, material storage and rooms that must stay usable**
- 04 Coordinate plumbing and carpentry before closing surfaces**

Before the visit

Share your exact Vavol society or street, property type and floor. Note vehicle or lift access and where materials can be kept. Confirm owner or society permissions for your property; availability and work arrangements are checked for the actual address.

02 / HOME RENOVATION.

Home renovation.

Coordinate room improvements, flooring, wall finishes and storage around the condition of your home. Discuss a single-room refresh or a phased renovation.

What may stay

Sound furniture and flooring can stay if they suit the plan. Spend first on faults and daily-use improvements rather than replacing everything.

Put this in the scope

List the rooms, protection, removal and cleanup. Agree material access, work hours and which spaces remain usable at each stage.

EXAMPLE / CONNECT THE WORK

Compare a living-room refresh on its own with a phase that also fixes a nearby leak. Agree the repair first so new paint or storage does not need to be opened again.

03 / KITCHEN RENOVATION.

Kitchen renovation.

AI illustration. A planning idea, not a completed local project.

Review cabinet condition, counter space, sink fittings and appliance positions. Compare a targeted kitchen refresh with a new measured layout.

What may stay

A useful countertop and sound cabinet bodies may stay while doors, drawers or hardware improve. Check moisture before enclosing new woodwork.

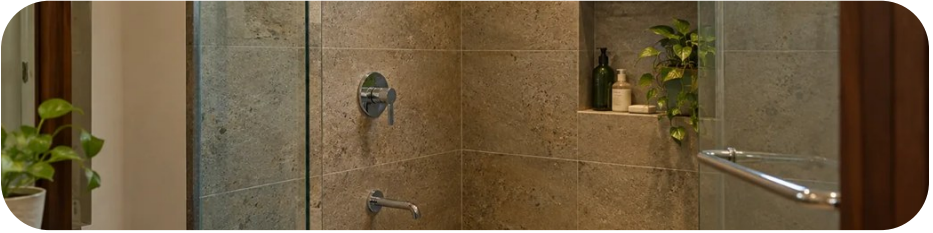

Put this in the scope

Record appliance sizes and sink connections. Ask who handles removal, reconnection and any wall repairs, and plan temporary cooking arrangements.

04 / BATHROOM RENOVATION.

Bathroom renovation.

AI illustration. A planning idea, not a completed local project.

Plan drainage, leaking fittings, tiles and vanity improvements together. Separate visible upgrades from any concealed repair the bathroom needs.

What may stay

Suitable sanitary fittings may be reused after inspection. A finish refresh depends on the condition of surfaces and underlying water connections.

Put this in the scope

Share when damp or leaks appear and any past repair. Agree opening, testing and reinstatement, plus which bathroom remains available during work.

05 / CARPENTRY & WARDROBES.

Carpentry & wardrobes.

Plan wardrobes, desks and household storage around room measurements. Arrange cabinet, drawer and door repairs where existing woodwork can be retained.

What may stay

Hinges, runners or a damaged panel may be replaceable without rebuilding a sound unit. Compare a repair with new storage of the same usable capacity.

Put this in the scope

Measure wall width, depth, doors and bed clearance. Ask for board grade, thickness, finish, hardware and installation in the written quote.

REPAIR OR ADD NEW STORAGE?

Compare adjusting doors and replacing runners with a new wardrobe. Match usable storage, materials and fitting costs; keep the bed route and service access clear in both options.

06 / PLUMBING REPAIRS.

Plumbing repairs.

Arrange checks for leaking taps, sink and basin joints, toilet fittings and renovation connections. Resolve water issues before surrounding finishes are closed.

What may stay

An accessible seal or fitting replacement may solve the problem. Ask for assessment before agreeing a larger pipe change or replacing a whole assembly.

Put this in the scope

Send photos and the timing of the leak. Confirm shutoff access and responsibility for shared lines, then agree labour, parts and checks after refitting.

CHECK AFTER RECONNECTION

For a sink repair beside cabinet work, agree who reconnects the water and waste fittings. Check the finished connections during normal use before the surrounding panel is closed.

07 / QUOTE, SAVE & SHARE

Quote. Save. Share.

Compare the same complete job

Ask for measured work, material specifications, labour, removal, delivery, cleanup, taxes and payment stages. Agree the cost and time of changes first.

Renovation estimates are free. Standalone carpentry or plumbing visits are ₹100, waived when you opt for the service. Labour and materials are agreed separately.
